Experiment 1-B

Student Name: Aryan Anthwal

Branch: BE-CSE

Semester: 5th

Subject Code: 23CSP-333

UID: 23BCS13302

Section/Group: Krg-3A

Subject Name: ADBMS

Date: 17 / 07 / 2025

Aim:

Medium-Level Problem

Problem Title: Department-Course Subquery and Access Control

Procedure (Step-by-Step):

1. Design normalized tables for departments and the courses they offer, maintaining a foreign key relationship.
2. Insert five departments and at least ten courses across those departments.
3. Use a subquery to count the number of courses under each department.
4. Filter and retrieve only those departments that offer more than two courses.
5. Grant SELECT-only access on the courses table to a specific user.

Sample Output Description:

The result shows the names of departments which are associated with more than two courses in the system.

Code:

-- Create Department Table

```
CREATE TABLE Department (  
    DeptID INT PRIMARY KEY,  
    DeptName VARCHAR(100)  
);
```

-- Create Course Table

```
CREATE TABLE Course (
```

DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

Discover. Learn. Empower.

```
CourseID INT PRIMARY KEY,  
CourseName VARCHAR(100),  
DeptID INT,  
FOREIGN KEY (DeptID) REFERENCES Department(DeptID)  
);
```

```
-- Insert Departments  
INSERT INTO Department VALUES  
(1, 'Computer Science'),  
(2, 'Physics'),  
(3, 'Mathematics'),  
(4, 'Chemistry'),  
(5, 'Biology');
```

```
-- Insert Course  
INSERT INTO Course VALUES  
(101, 'Data Structures', 1),  
(102, 'Operating Systems', 1),  
(103, 'Quantum Mechanics', 3),  
(104, 'Electromagnetism', 2),  
(105, 'Linear Algebra', 3),  
(106, 'Calculus', 3),  
(107, 'Organic Chemistry', 4),  
(108, 'Physical Chemistry', 4),  
(109, 'Genetics', 5),  
(110, 'Molecular Biology', 5);
```

```
SELECT DeptName  
FROM Department  
WHERE DeptID IN (
```

```
SELECT DeptID  
FROM COURSE  
GROUP BY DeptID  
HAVING COUNT(*) > 2  
)
```

```
-- Step 1: Create Login at server level (run this in the master database)  
CREATE LOGIN AMAN  
WITH PASSWORD = 'AMAN@04';
```

DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

Discover. Learn. Empower.

-- Step 2: Switch to your target database (replace with your actual database name)

USE DB_KRG_3A;

-- Step 3: Create a user for that login inside the current database

CREATE USER AMAN_04 FOR LOGIN AMAN;

-- Step 4: Grant SELECT-only access on the Course table

GRANT SELECT ON Course TO AMAN;

Output:
